Creating Prosperity
Chevron's Global Social Investments
Chevron partners with local governments, businesses, nongovernmental organizations and communities to identify local needs, and invest in solutions and programs that will deliver measurable and lasting results. Over the past eight years, we’ve made nearly $1.5 billion in social investments in local communities, such as those represented on this map.

Chevron’s Social Investments

Chevron contributes to the economic and social well-being of people in the countries where we operate because we have learned through decades of experience that our business success is deeply linked to society’s progress and built upon long-term and mutually beneficial relationships that contribute to local economies. Our social investments, with a significant focus on health, education and economic development programs, aim to create prosperity now and for generations to come.
This program aims to leverage existing resources, partnerships and volunteers to provide complementary educational, sports, enrichment and vocational opportunities that build life skills and promote job readiness for young women and men living in vulnerable communities in El Salvador, Guatemala, Honduras and Panama.

This program focuses on reducing unemployment through vocational training and includes free one-on-one software training to computer operators, food handling, horticulture and other trades.

Through our partnership with Pact, we support the sustainable, community-based, government-backed PROMOT project to prevent mother-to-child transmission of HIV in Bayelsa State. To date, nearly 7,400 women have been tested for HIV during prenatal care.

Through an economic development program from the Chevron-funded Niger Delta Partnership Initiative (NDPI), fish farmers and local entrepreneurs participate in workshops and training programs at economic development centers in Warri and Port Harcourt.

As partners with the Angolan government, we’re setting up a business resource center in Cabinda to provide ongoing consulting and mentoring to small and medium-sized businesses to help them improve their productivity and competitiveness.

We’re supporting this Texas Children’s Hospital program, which supplies doctors to Liberia and Angola to provide maternal and child health care, and train African physicians and nurses.

In partnership with the U.S. State Department’s African Women’s Entrepreneurship Program (AWEP), 750 female farmers and small business owners throughout Liberia have established business and management training designed specifically for unschooled participants, and three regional food processing centers have been equipped with rice- and cassava-processing machinery.

We’ve supported this Texas Children’s Hospital program, which supplies doctors to Liberia and Angola to provide maternal and child health care, and train African physicians and nurses.
