Manish Misra
Vice President, Strategy & Integration
Chevron New Energies

Manish Misra is the vice president of strategy for Chevron New Energies, a position he assumed in October 2021. In this role, he is responsible for accelerating Chevron's lower carbon business solutions, including guiding the overarching business strategy and integration with Chevron's global operations.

Prior to his current role, Manish served as a director of Capital Projects for Chevron Technology Center, overseeing major capital projects in Asia Pacific region for our Upstream businesses and globally for projects in Downstream & Chemicals business.

Misra joined Chevron in 2004, leading the development of many of the international master agreements Chevron has with leading equipment and service suppliers. In 2006, he moved to the Chevron's Project Resources Company, the organization which manages investments in new major capital projects. This gave him the opportunity to manage a mix of onshore, offshore and new technology related projects, from the conceptual stage of the projects through construction and commissioning and in diverse locations ranging from Korea, Kuwait, Nigeria, Australia and the U.S. He also held operational leadership roles in Thailand and Indonesia.

Manish started his career as a civil engineer in India, working on large industrial projects in the petrochemical sector. He then moved to management consulting, working on supply chain engagements with large oil and gas clients in the U.S. His work entailed a wide variety of strategic sourcing initiatives to manage third-party material and services costs and streamline processes, tools and organization structure for the procure-to-pay cycle for Fortune 50 companies.

Misra has a bachelor's in technology from Indian Institute of Technology, Varanasi, India, and an MBA from Kelly School of Business, Indiana University at Bloomington, U.S.A.
