the power of problem solvers

human energy*

Narrator:	00:02	At Chevron, we are relentless problem solvers. Our challenge is to ensure the world has energy that is more affordable, reliable and ever cleaner.
Kelsey:	00:13	I enjoy being creative and hands on with my crew to see what we can change and what we can implement to make our operations better. I ask about a hundred and fifty million questions a day. The more you ask the more you learn and the more you learn, the more that your able to innovate.
Narrator:	00:30	Chevron's greatest asset, our human energy is up to the challenge.
Mauricio:	00:35	We've been testing technologies that will take pictures and measurements without having somebody going in these confined spaces.
Yuguang:	00:43	The most important lesson I learned here at Chevron I would say is being more open-minded. You'll be surprised at how much you could learn from people with a different background. Certainly, solving large and complex problems require teamwork.
Narrator:	00:57	Finding the answers to the world's most complex energy challenges won't be easy but you can count on us to be there.
